

## How to use the marine debris tracker app

We will also be learning how to use the marine debris tracker app. This app, available for iOS and android systems, allows you to report debris you see at any time in any place.

The app is available for downloading--

- It is available for android systems here:  
<https://play.google.com/store/apps/details?id=edu.uga.engr.geolog.marin.edebristrack>
- And for Apple here:  
<https://itunes.apple.com/us/app/marinedebristracker/id432758761>

Look for the above logo to download.

### Why use the marine debris tracker app?

Your group may not have the capacity to do a full count and weighing of debris every time you organize a beach or river cleanup. And yet, you may still want to share data about what you're finding in local waterways. The marine debris tracker app is a good alternative that will provide data to researchers.

A flyer, **produced by NOAA**, provides further information about the marine debris tracker app. It is available in its original form here:
